

Technical description

INTERIO P29 system produced by Tehnomarket is used for glass partition walls and interior doors. It was designed for modern commercial applications and projects that require exclusive materials, quick, dry installation and refined appearance. INTERIO P29 system is available in two visually distinct options: with aluminum doorframe and optional wooden door, as well as glass option with the integrated glass door. The system is designed for the maximal transparency and exceptionally narrow installation depth of just 29mm that allows for different interior partitions without the loss of the valuable interior space.

- Aluminium profiles were manufactured in Tehnomarket's own extrusion factory. The raw material used is primary aluminium alloy AlMgSi0.5 (AA6063 and AA6060).
- The basic system profiles have a 25mm visible height and 29mm installation depth.
- System is compatible with glass panels from 6mm to 13,5mm in the fixed partitions and glass doors.
- Support for 38mm wide wooden door sash with 38mm with 48mm aluminum door frame.
- Maximal door height of 2700mm with 100kg maximal weight.
- INTERIO P29 system supports maximal partition height of 3240mm.
- Up to 1500mm wide partition elements.
- Two finish options: RAL powdercoating and anodisation
